

HomeFront Cyber Support And Security LLC

Office of the Owner

National Cybersecurity Awareness Month

As businesses are increasingly moving to the cloud, cybersecurity measures have never been so important.

October is National Cybersecurity Awareness Month (NCSAM), and as such, we encourage HomeFront Cyber Support And Security LLC employees, vendors, friends, and family to take proactive steps to enhance personal and collective cybersecurity. NCSAM is a collaborative effort between government and industry to raise awareness about the importance of cybersecurity and to ensure that all Americans have the resources they need to be safer and more secure online.

Every HomeFront Cyber Support And Security LLC employee can help prevent malicious cyber-attacks by establishing effective cybersecurity practices, which include digital and non-digital methods. Cybersecurity is an essential factor to the success of any business or organization and we strongly encourage collaborative efforts across all sectors.

Throughout October, HomeFront Cyber Support And Security LLC is committed to providing the necessary training and educational programs for all employees and clients to further cybersecurity awareness within our organization and for those we serve. We will provide employees and clients with the resources necessary to improve cybersecurity and #BeCyberSmart while at work and home. HomeFront Cyber's cybersecurity and information technology teams are at the lead edge of protecting our company and our customers' data. We are only able to be cyber secure because of our collective vigilance and the work of our technology teams.

HomeFront Cyber Support And Security LLC is proud to participate in these National level conversations around cybersecurity and will continue to champion the NCSAM message through its mainstream and social media.

Now, therefore, I, Mark Cook, Owner and Lead Tech of HomeFront Cyber Support And Security LLC, do hereby proclaim my commitment, and HomeFront Cyber's to enhancing cybersecurity and being a champion of National Cybersecurity Awareness Month.
